

THE EASY PEEL RIPPLER SYSTEM

If you're a packager of Easy Peel products, MDC Engineering can improve the easy peel feature of your packages.

It can be a frustrating experience for a consumer to open an easy peel package that has resealed itself.

No Rippler
Poor aesthetic, prone to resealing issues

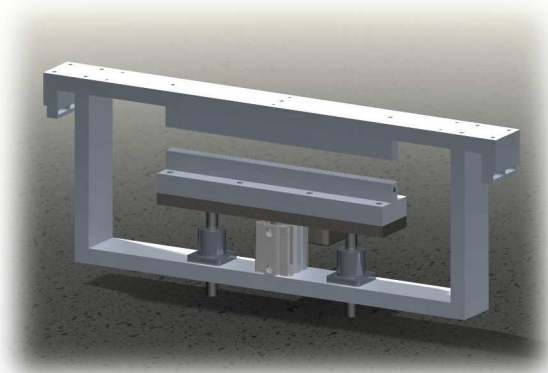

Competitor Rippler
Poor aesthetic, reliable opening

MDC Easy Peel Rippler
Best aesthetic, reliable opening

Our system is custom made for each model machine and self contained requiring 220v, 30psi of air and a dry contact for activation, the system can run up to 25CPM and can ripple 2 rows back to back. This is the most cost effective system as it does not require any tooling modifications.

Regardless of what type of rollstock machine or model you have, MDC Engineering can install our proven Rippler system, assuring you of a consistent easy peel feature.
