

# Have it Your Way!

At MDC we understand that your products and approach to market are unique including satisfying the most stringent packaging and labeling requirements. To meet these objectives, MDC partners with your team to develop the final compliant package and ensure your system is 100% FDA validatable.

Every new MDC machine is provided with a complete bill of materials including 3rd party part numbers, assembly, electrical and pneumatic drawings. You choose the controls your facility is most comfortable with.

All manufactured parts are made in house and we stress to our vendors to source US components whenever possible.

Our philosophy of customer relationships is one of partnership characterized by cooperation, teamwork and culpability towards the achievement of a mutual goal.

## Servo Drives
